

Application Description

DUST REMOVAL OF ABSORBING NONWOVENS

Xstream high speed
non contact
surface cleaning
technology with
iONstream AUTO^{DC}
ionisation system

Application Information
DUST CONTROL

Application Description

Prevent absorbing Nonwovens from dust and loose fibers!

The nonwoven converting process can produce a lot of loose particles that need to be removed and collected. It is important, that they do not rest on the end product. Our technology ensures a dust-free process to ensure your customers receive a high quality product. Absorbent pads are designed to help extend the shelf life of meat, seafood, poultry, fruit and vegetables.

Key Features:

- Retrofittable – fast and easy installation in any existing system
- Up to 10.000mm web width
- Up to 2.000m/min web speed
- Fully automated including AUTO^{DC} ionisation
- All parameters and system efficiency can be visualized

Our product is ideal for many processes:

- Unwinding-Rewinding
- Converting
- Printing
- Slitting
